

InfinityDS™ ...FOR YOUR HOME

ARCHITECTURAL WINDOW FILMS by SunTek®

- Attractive, natural appearance
- Available in Neutral and Bronze
- Great solar heat and UV rejection
- Fade and corrosion resistant
- Exclusive Manufacturer's Warranty

"The hot spots in my home were unbearable prior to the installation of SunTek Window Film. The InfinityDS line provided the heat reduction that I needed, making my home much more comfortable. The film looks great, and also provides UV protection and glare reduction. I am extremely pleased with the benefits associated with SunTek films."

InfinityDS™...FOR YOUR OFFICE

ARCHITECTURAL WINDOW FILMS by SunTek®

CASE STUDY

John and Tammi McCarraher, owners of a Cold Stone Creamery franchise in Dartmouth, Massachusetts, were faced with a unique problem – melting merchandise. Their ice cream cakes and “to-go” pints of ice cream were being stored in a display freezer located in the front of their store. The large, all-glass storefront was being hit by direct sunlight throughout the majority of the day, causing the cakes and ice cream to melt before they were sold.

The McCarrahers needed a fast, easy solution to their problem – the solution was SunTek® Window Films. The Infinity Designer Series (IDS) was chosen for the entire project. The IDS 35 Neutral was chosen because it offers high heat rejection and glare reduction. Additionally, the film would not dramatically alter the interior or exterior appearance of the windows.

The installation of SunTek Window Film immediately solved the McCarrahers’ problem. In addition to a significant decrease in wasted desserts, the McCarrahers also noticed a decrease in energy costs. Lastly, they were pleased with the reduction in glare and the new appearance of their windows.

INFINITYDS™ SERIES

PERFORMANCE DATA	IDS 35B*	IDS 20B*	IDS 50	IDS 35	IDS 20
Visible Light Transmittance	37%	25%	49%	40%	23%
Total Solar Transmittance	31%	13%	49%	35%	21%
Total Solar Reflectance	24%	47%	12%	18%	26%
Total Solar Absorbance	45%	40%	39%	47%	53%
Visible Light Reflectance					
Interior	22%	34%	11%	16%	27%
Exterior	25%	37%	12%	17%	28%
Winter U-Value	0.92	0.94	1.06	1.06	1.04
UV Rejected	99%	99%	99%	99%	99%
Glare Reduction	58%	72%	47%	55%	74%
Shading Coefficient	0.45	0.25	0.64	0.54	0.40
Solar Heat Gain Coefficient	0.39	0.22	0.56	0.47	0.35
Total Solar Energy Rejected	61%	78%	44%	53%	65%
